Morton Community Unit School District 709
Providing an Education to Last a Lifetime

Common Apps

Teachers can use a wide variety of Apps with their classes to enhance and enrich the educational experience. Below are some of the more commonly used apps. If your student's class is using additional apps and you have questions regarding the apps, please contact the school for additional information.

AirWatch MDM	**AirWatch MDM is the app used by the district to help manage the district's iPads. It sets up district email, provides access to the District App site and to the District iBook site.**
DropBox	**DropBox is a app that allows access to cloud storage. Students create accounts to secure their information in the cloud. Students can share access to their storage with teachers and their peers.**
Edmodo	**Edmodo is an app that creates an online classroom. Students can interact with the teacher and their peers in the class. Teachers can share documents with their students through this app and collect documents from their students. Students create an account for Edmodo and access to the classroom is controlled by the teacher.**
Educreations	**Educreations is an App that allows students to use their iPad as a whiteboard. Teachers and students can record what they are drawing on the witheboard and then share with others.**
Google Docs	**Google Docs is a app that allows access to cloud storage. Students create accounts to secure their information in the cloud. Students can share access to their storage with teachers and their peers.**

	PDFNotes is an annotation app that allows students to open PDFs and write on them and save those annotations. PDFs can be opened from sites like Edmodo or from emails.
	Prezi is a cloud based presentation app. It can be used to present information much like PowerPoint. Prezi does allow for multiuser collaboration. Users should avoid placing personal information like name and address on their Prezis.
	Quizlet allows for the creation and sharing of online flashcards. The app allows for the review of information in a variety of study modes.
	Socrative is a student response system that allows teachers to gage student understanding in real time. Responses can range from multiple choice to text responses.
